EDUCATION

Higher Technician
Multiplatform Application Development
2022 - 2024

LANGUAGES

Spanish Native
English B2 Intermediate

CORE STACK

Backend

- Java 8
- Spring Boot
- Spring Security
- REST APIs
- JPA/Hibernate

Frontend

- React
- TypeScript
- Redux Toolkit
- Tailwind CSS

Database

- MySQL
- Redis
- MongoDB

DevOps

- Docker
- CI/CD
- Git

AI Integration

- LLM APIs (OpenAI/Gemini)

Jorge Casanova Sánchez

Full Stack Developer

Java · Spring Boot · React · Docker · CI/CD

PROFESSIONAL PROFILE

Full Stack Developer specialized in Java and Spring Boot, with a solid frontend foundation in React. I come from a technical background in Multiplatform Application Development (DAM) and spent the last year building complete, production-style applications on my own, going from zero to deploying full projects with authentication, testing, and containerization.

KEY COMPETENCIES

- Backend Development:** Development of REST APIs with Java, Spring Boot, Spring Security, and JPA/Hibernate, applying scalable architecture.
- Frontend Development:** Creation of modern and responsive interfaces with React, TypeScript, Redux Toolkit, and Tailwind CSS.
- Authentication and Security:** Implementation of authentication using JWT and expanding knowledge of OAuth2 and Spring Security.
- Software Quality:** Development of unit tests and integration with JUnit and Mockito to ensure more robust applications.
- DevOps and Deployment:** Containerization with Docker, version control with Git, and continuous integration and deployment (CI/CD).
- Databases:** Design and management of relational and NoSQL databases with MySQL, MongoDB, and Redis.
- Artificial Intelligence Integration:** Development of functionalities using OpenAI and Gemini APIs to incorporate AI capabilities.
- Continuous Learning:** Development of end-to-end full-stack projects applying modern technologies and production standards.

WORK EXPERIENCE

Junior Backend Developer Sep 2024 - Dec 2024
Abaco Developments I Madrid

- Implementation of a data filtering and editing module, optimizing the most frequent queries to the database.
- Improving the user interface through iterations based on customer feedback, reducing friction in the main application flows with JavaScript.
- Collaboration with the team in resolving incidents and evolutionary maintenance of the application.
- First professional experience in development, working with version control, communication with clients and real business requirements.

FEATURED PROJECT

Notes AI — AI-Powered Notes Assistant — www.notes-ai.com

Backend

- JWT + OAuth2 (Google)
- REST API and layered architecture
- MySQL (JPA/Hibernate)
- Unit tests (JUnit 5 and Mockito)

Frontend & DevOps

- React + Vite
- Docker
- CI/CD (GitHub Actions)
- Deployment: Render + Vercel

AI Integration (LLM APIs): Groq (Llama 3) for note generation and summarization
